Leading laser performance.
Premium color and value.
HP LaserJet managed printers and MFPs

The industry's
strongest print security[1]

Maximize uptime,
minimize downtime

Glossy, consistent output
on a wide range of media

Next generation technology

Now it's easier than ever to find the perfect device to fit your printing needs—with the next generation of HP LaserJet Managed printers and MFPs. Whether your office needs small or large monthly print volumes, color or monochrome printing, additional input or finishing features, or advanced workflow capabilities—HP has you covered.

Low operating costs

The industry's strongest print security[1]

Pull-out keyboard, HP EveryPage, embedded OCR, send to Microsoft® SharePoint®, and more on HP Flow devices

Comprehensive input and finishing accessories across the portfolio

Glossy, consistent output on a wide range of media

Print speeds up to 60 pages per minute (ppm)[2]

Maximum input capacity up to 6,140 pages[3]

Recommended Monthly Page Volume (RMVP) up to 100,000 pages[4]

Legendary HP quality and reliability

Keep work flowing with MFPs that offer fast copying, scanning, and faxing

Quality, reliability, and efficiency

From the small office to the large enterprise business, HP LaserJets deliver the performance, extensibility, and print shop quality color documents you need. What's more, these devices help you conserve energy without sacrificing quality or reliability.

Virtually eliminate warm-up time. These devices feature fusers that warm rapidly and cool quickly, so they start printing sooner, complete jobs faster, and help you conserve more energy.[5]

Get the best print quality automatically, right out of the box. There's no need to change driver settings or the control panel. HP LaserJets employ built-in proprietary image enhancement technologies that consistently render vibrant and sharp color prints, page after page.

Invest in forward-thinking HP extensibility. HP FutureSmart Firmware and the HP Open Extensibility Platform (OXP) are innovations that help simplify the development and management of printer firmware and workflow applications while extending the life of HP devices. As technology and capabilities evolve, HP extensibility can help your business and your devices change and adapt as well.

Low
operating costs

Avoid snags in your workflow. HP LaserJets are designed to minimize workgroup interruptions and maximize uptime while delivering fast, reliable results. So you get the documents you need without all the hassle.

Keep moving forward

Spend less time on maintenance. These devices require significantly fewer replacement parts and no manual cleaning of printer components is required to maintain print quality.[6]

Depend on robust paper handling. With a large RMPV of up to 100,000 pages, these devices are built to keep up with the pace of your busy office.[4]

Minimize downtime. Original HP LaserJet high-yield cartridges can help you print more pages, more affordably.

Depend on legendary HP quality and reliability

Prior to its introduction, a new HP device undergoes rigorous HP testing. The result is a solid, reliable product that produces excellent output quality over the life of the device and its supplies.

Easily meet high-volume demands

These devices offer an optional maximum paper capacity of up to 6,140 sheets. Plus, with a wide array of finishing accessories—such as a stapler/stacker or booklet maker—creating the right configuration for your office is easy.
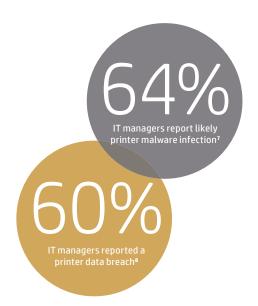

Industry-leading solutions and features

Unsecured firmware, hard drives, control panels, input and output trays all can open devices—and the network—to attack. HP provides the industry's strongest print security to help protect your devices, data, and documents.[1]

64%
IT managers report likely printer malware infection[7]

60%
IT managers reported a printer data breach[8]

Secure the device

HP Sure Start keeps BIOS safe

Whitelisting keeps firmware safe

Run-time intrusion detection keeps memory safe

Secure the data

Authentication prevents unauthorized access

Encryption prevents data theft and alteration

Monitoring identifies threats and self-heals

Secure the document

Workplace privacy and compliance through secure document workflows

Anti-counterfeit tools deter tampering and fraud

Easily manage security across the fleet

HP JetAdvantage Security Manager delivers the most comprehensive printing security in the market, with policy-based protection for printing and imaging devices.[9] Get the support you need to build, deploy, and maintain your device security and compliance plan.

Save time and work smarter with HP LaserJet Flow MFPs, which offer advanced workflow capabilities to help you capture the right content quickly, easily, and accurately.

HP LaserJet **Flow MFPs**[10]

Embedded HP EveryPage technology

Scan every page and detect potential errors or missed pages on the spot—even when the weight, size, or condition of pages vary

Large 8.1-inch touchscreen control panel

Advanced imaging and processing options, including send to Microsoft SharePoint, built-in OCR, auto-orientation, auto-page-crop, and auto-tone

Fast two-sided, single-pass scanning

Scan faster and more reliably with speeds up to 200 ipm and an extended-life ADF that supports higher recommended monthly scan volumes[11]

Large pull-out keyboard for simplified data entry

Make scanned documents easier to organize and find by adding information to files and context to your email
